September 30, 2004

## **PREFACE**

This report presents the results of a **Watershed Evaluation and Recommendations Project** for the Town of Rico, Colorado. This Report was prepared by Matrix Design Group, Inc. of Denver, Colorado at the request of the Colorado Water Conservation Board in cooperation with the Environmental Protection Agency and Colorado Department of Public Health & Environment.

Copies of this report are available for public inspection or distribution, for a nominal fee, at the offices listed below or on their website.

### **Colorado Water Conservation Board**

1313 Sherman Street, Room 719  
Denver, Colorado 80203  
(303) 866-4803

### **Town of Rico**

P.O. Box 56  
Rico, Colorado 81332  
(970) 967-2863

### **Matrix Design Group, Inc.**

1601 Blake Street, Suite 200  
Denver, Colorado 80202  
(303) 572-0200

This Watershed Evaluation Report was prepared under the direct supervision and direction of the undersigned whose seal as a Professional Engineer is affixed:

# Dolores River Watershed Evaluation and Recommendations Report

## Acknowledgements

This Watershed Evaluation project was prepared over a three-month period from April 2004 to June 2004 to guide protection of the watershed and provide better tools for management of the Dolores River watershed. The **Colorado Water Conservation Board** provided oversight for the project, and the **Town of Rico**, as the local project representative, provided project direction. **Matrix Design Group, Inc.** was selected as the engineering consultant to complete the project. The Environmental Protection Agency and Colorado Department of Public Health & Environment provided continuous oversight at monthly meetings throughout the project duration. With additional support from the Environmental Protection Agency and the Town of Rico, the initial work funded by the Colorado Water Conservation Board was presented to stakeholders, reviewed by the stakeholders, and then revised during the period from July 2004 to September 2004.

The following individuals contributed many hours to the development of this report:

### **Town of Rico**

Eric Heil, Esq., Project Coordinator  
Ashton Harrison, Town Manager

### **Colorado Water Conservation Board**

Brian Hyde, Project Sponsor

### **Matrix Design Group, Inc.**

Robert Krehbiel, PE, Stream Restoration  
Linda Balcom, Environmental

### **Environmental Protection Agency**

Marc Alston  
Carol Russell  
Gary Kleeman  
Karl Hermann

### **Colorado Department of Public Health & Environment**

Mark Walker

# Table of Contents

<b>CHAPTER 1: Introduction and Background .....</b>	<b>I-1</b>
Background.....	I-1
Watershed Issues .....	I-2
Guiding Principles .....	I-3
Scope of the Project.....	I-3
<b>CHAPTER 2: Reach Descriptions .....</b>	<b>II-1</b>
Reach A: County Boundary to Spruce Gulch.....	II-4
Reach B: Spruce Gulch to Below Town.....	II-4
Reach C: Below Town.....	II-5
Reach D1: Town Lower Reach – Rico Boy and Santa Cruz Mines .....	II-5
Reach D2: Town Lower Reach – Pasadena Smelter .....	II-5
Reach D3: Town Bridge and Columbia Tailings Cap .....	II-6
Reach D4: Downstream of Silver Creek.....	II-6
Reach D5: Highway Bridge to Silver Creek.....	II-7
Reach E: Highway Bridge to St. Louis Ponds .....	II-8
Reach F: St. Louis Ponds.....	II-8
Reach G: Chutes .....	II-9
Reach H: Town Well .....	II-9
Reach I: Silver Creek.....	II-10
<b>CHAPTER 3: Environmental Issues .....</b>	<b>III-1</b>
Background.....	III-1
Summary of Environmental Investigations .....	III-1
Environmental Protection Agency Investigations .....	III-1
Wash Environmental Phase I and Phase II .....	III-2
ARCO VCUP/NAD Program.....	III-2
Titan Geologic and Geochemical Investigations .....	III-3
CDPHE and ARCO Lead Characterization .....	III-4
Treatment Alternative St./ Louis Ponds, Masters Thesis.....	III-4
CDPHE Water Quality Assessment.....	III-5
U.S. Fish and Wildlife Service Memorandum.....	III-5
CDPHE Brownfield’s Assessment .....	III-6
ARCO Residential Soils VCUP program .....	III-6
Relevant Findings .....	III-6
Environmental Concerns by Reach.....	III-7
<b>CHAPTER 4: River and Floodplain Issues.....</b>	<b>IV-1</b>
Dynamic Equilibrium .....	IV-1
Defining Channel Instability.....	IV-2
Shear Stress.....	IV-3
Bedload Sediment Transport .....	IV-4
Basis for Channel Stabilization .....	IV-5
Causes of Instability .....	IV-6
Flood History and Gage Records.....	IV-8
Floodplain Studies .....	IV-9
River Issues.....	IV-9

<b>CHAPTER 5: River Recreation and Habitat</b> .....	<b>V-1</b>
Fishing and Trout Habitat.....	V-1
The Dolores River Fishery.....	V-1
Existing Habitat Degradation.....	V-1
Stream Development Projects.....	V-1
Effects on Spawning Trout.....	V-2
Spawning Seasons and Habitat.....	V-3
Construction Practices and Spawning.....	V-3
Recreational Value of the Dolores River.....	V-4
Fishing.....	V-4
Boating.....	V-4
Planning for River Access and Use.....	V-6
Vegetation and Riparian Habitat.....	V-7
Functions and Values.....	V-7
Critical Areas.....	V-8
Recommendations to Preserve Critical Reaches.....	V-8
Buffer Zone Recommendations.....	V-9
Wildlife Protection Zones.....	V-9
Elements and Standards of a Healthy Aquatic Ecosystem.....	V-10
<b>CHAPTER 6: Potential River Restoration</b> .....	<b>VI-1</b>
Channel Stabilization.....	VI-1
Approaches to River Restoration.....	VI-2
Types of Stabilization.....	VI-3
Hard Controls.....	VI-4
Rock Riprap.....	VI-4
Spurs, Dikes, Deflectors, Hardpoints, Groins, Vanes.....	VI-4
Grade Control Drop Structures.....	VI-7
Soft Controls – Bioengineered Treatment Functions.....	VI-8
Stream Stabilization Alternatives.....	VI-8
Selecting the Best Alternative Bioengineered Treatment.....	VI-8
Effectiveness of Treatments.....	VI-9
Maintenance of Bioengineered Treatments (Watering and Weed Control).....	VI-9
Previously Proposed Improvements.....	VI-9
Additional Proposed Improvements.....	VI-11
Implementation.....	VI-13
Public Involvement.....	VI-13
Enlisting Expertise.....	VI-13
Funding.....	VI-14
Next Steps.....	VI-14
